Ms. Sweety Jain  
(Department of Commerce)

Mr. Rahul Singh  
(Department of Commerce)

Ms. Rashmi Sachan  
(Department of Commerce)

Ms. Kshma Singh  
(Department of Commerce)

# ABOUT THE WORKSHOP

Flutter is Google's portable UI toolkit for crafting beautiful, natively compiled applications for mobile, web, and desktop from a single codebase. Flutter works with existing code, is used by developers and organizations around the world, and is free and open source. This '**Three Days WORKSHOP ON ANDROID DEVELOPMENT WITH FLUTTER**' will opens up a door of endless opportunities for the students of LPCPS. The Flutter framework makes it easy for you to build user interfaces that are beautiful, fast, and responsive. The framework is also extensible, so you can easily add new features and functionality. The same code can be used to build apps for both iOS and Android devices from a single codebase rather than switching between different platforms. This can save a lot of time and effort when developing mobile apps. In addition, Flutter can be used for web development to create web applications.
