

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

## Sample files for Seminars and International Conference

The most cutting-edge and contemporary teaching strategy is the seminar approach. An advanced group method typically utilised in higher education is the seminar. It's a method of teaching where a scenario is created for a group to engage in facilitated discussion about a subject.

These meetings give educators a chance to network, pick the brains of subject matter experts, and remain current on innovations in their fields. It is impossible to overestimate the significance of conferences in education since they will have a major influence on how teaching and learning are conducted in the future.

### SEMINAR ON 'WOMEN EMPOWERMENT'

Dated: 04/Feb/2023

### SEMINAR ON 'WOMEN EMPOWERMENT'

Beautiful •Confident •Strong In collaboration with the Chhanv Foundation, LPCPS organised a session on 'Women Empowerment'. Our speakers, Ms. Sarita Nirjhra and Mr. Ajeet talked about how despite one's failures and disabilities, one can pursue their dreams with their will. Students got an opportunity to interact with acid attack victims and differently abled speakers who shared their struggles on not being accepted by society and how Sheroes where people irrespective of their social and economic status come together to help those in need through their rehabilitation programmes and help them become their best selves.
