

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

## Sample files for Workshop

We organise various workshops for students to provide them with appropriate technical knowledge on the relevant topic. Attending workshops can help someone acquire new skills for a better future. For example, participants in the most recent financial modelling workshop could discover how to examine and understand spreadsheet data. It also permits data manipulation and administration.

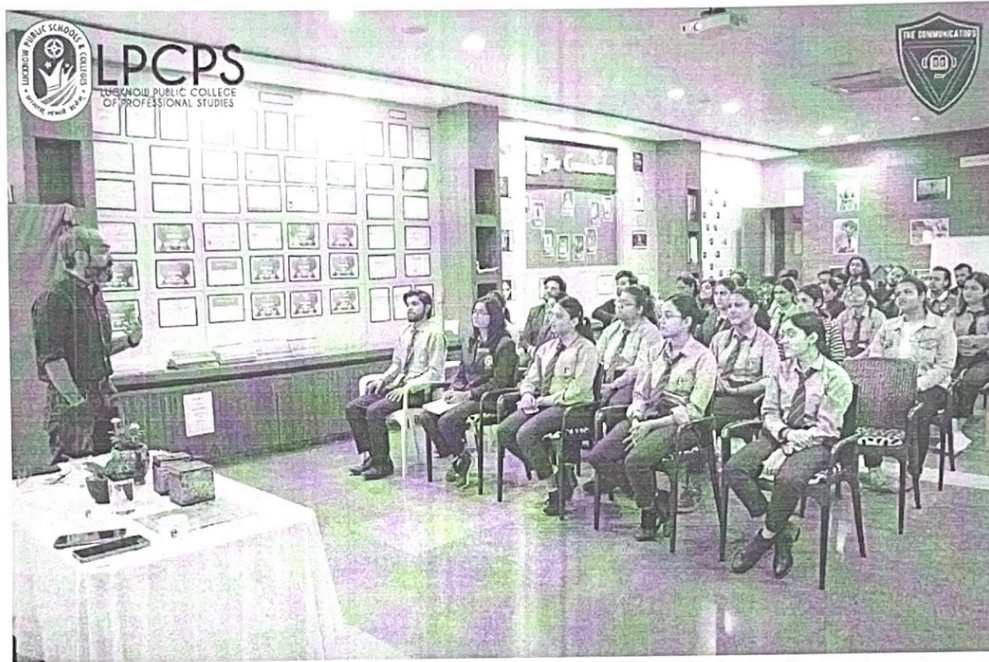

### Significance:

1. While the speaker in a lecture addresses the audience, workshops and seminars are run by individuals who may serve as mediators. It will also facilitate discussions that are relevant to the business world by fostering conversation and generating various ideas on a given subject.
2. There are different topics that define professional importance. Seminars and workshops help in addressing various issues and problems of students. That provides the chances to the business professionals to face on a regular basis. Insights and thoughts of the participants could be shared based on the method of resolving different problems, which further offers fresh perspective and opinion while someone deals with some problems.
3. Workshops and seminars help a person to develop a new skill set for their better future. For instance, in the latest financial modelling workshop, attendees could learn the pattern of exploring and interpreting data of a spreadsheet. It further allows data management and manipulation. This will help you learn best practices.
