

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

Sample files for Industrial Visits

We organise industrial visits at various reputed industries to provide better industry-academic experience to students. We focus on practical aspects along with theoretical concepts of production management, operation management, and human resource management.

Students get a firsthand look at actual work environments, including workstations, plants, assembly lines, machinery, and systems. They also get to engage with highly skilled and knowledgeable staff members during these excursions. Students get a wealth of knowledge that will benefit them both now and in the future.

- Students get the chance to learn practically through interactions, working procedures, and employment practices during industrial visits.
- It exposes the students to real-world work procedures rather than the theoretical information they are taught in college classes.
- Students get a fantastic opportunity to engage with industries and learn more about the industrial environment through industrial visits.
- Colleges plan industrial visits for their students in an effort to give them a chance to learn more about the various industry sectors, including marketing, manufacturing, IT, services, and finance.
- An industrial visit aids students in fusing their theoretical understanding of business operations with real-world experience.
- Through industrial visits, students are exposed to the realities of industry.
